

Date: 25 May 1982

Memorandum for the Record

From: Ms. Betz, Quality Control Lab., Environmental Section, NREAB, BMaintDiv

Subj: Briefing Col Millice on April's Trihalomethane Analysis

- 1. On 14 May 1982, I was sent to Lt Col Fitzgerald's office to brief him on the trihalomethane analysis for April from Grainger. He took me into Col Millice's office to brief him at the same time. I gave the Colonel a list of sample points in order.
- 2. Col Millice requested that a summary be prepared and submitted to him with the future trihalomethane analysis.
- 3. No mention was made of extra peaks that Grainger found in the Tarawa Terrace and Hadnot Point Systems samples.
